Feature ID: F-6.5.14
Feature Name: Claim Packet Generator
Version: 1.0
Date: March 13, 2026

1. FEATURE IDENTITY

1.1 User Problem Solved

Travelers who experience covered incidents need professional, complete documentation to submit claims to insurers and credit card issuers. Filing claims requires:

- Organizing scattered evidence (receipts, emails, confirmations)
- Writing a coherent narrative of what happened
- Citing correct policy clauses and coverage terms
- Formatting everything professionally for adjuster review

Most travelers don't know what insurers need, struggle with claim language, and submit incomplete packets that delay or deny valid claims.

Platform solves this by: Generating professional, complete claim packets with all required documentation, evidence references, coverage analysis, and narrative — formatted exactly as insurers expect.

1.2 Scope (What This Feature Does)

IN SCOPE:

- Generate professional PDF claim packets (13-page structured format)
- Pull data from incident timeline, evidence uploads, and coverage determination
- Include human-centered narrative in first person
- Provide coverage clause-by-clause analysis
- Index all evidence with clear references (EV-001, EV-002, etc.)
- Allow user to edit narrative before finalization
- Support regeneration (max 2x) if evidence added or narrative changed
- Generate supplemental evidence packets (1-page cover + new files)
- Smart submission logic (1 file vs 2-3 vs 4+ files)
- Export to PDF with DRAFT watermark (removed on finalization)
- Email copy to user's inbox
- Add insurer claim number post-submission
- Track regeneration count and enforce limits

OUT OF SCOPE:

- Auto-submission to insurers (platform NEVER submits claims)
- Predictive outcome language ("you qualify", "guaranteed")
- Legal advice or claim success guarantees
- Filling PDF forms on behalf of insurers
- Direct API integration with insurer claim portals (Phase 2+)
- Automated follow-up with adjusters (Phase 2+)
- Voice narration for narrative edits (Phase 2+)

1.3 Non-Scope (What This Feature Explicitly Does Not Do)

Platform does NOT:

- File claims on user's behalf
- Predict claim outcomes or approval likelihood
- Guarantee reimbursement amounts
- Communicate directly with insurers
- Modify locked fields (totals, dates, policy numbers)
- Allow unlimited regenerations (limit: 2 regenerations)
- Parse insurer emails for requested documentation (Phase 2+)

---

2. USER STORIES

Primary User Story

As a traveler who experienced a covered incident
I want to generate a professional claim packet
So that I can submit complete, organized documentation to my insurer without missing required information

Supporting User Stories

Story 1: Generate Initial Packet

- **Given** I've uploaded all required evidence and coverage has been determined
- **When** I click "Generate Claim Packet"
- **Then** Platform generates a 13-page PDF with all sections populated from my incident data

Story 2: Edit Narrative Before Submission

- **Given** I've generated a claim packet
- **When** I review the narrative and find it needs clarification
- **Then** I can edit the narrative text and regenerate the packet

Story 3: Add Evidence After Packet Generated

- **Given** Adjuster requests additional documentation
- **When** I upload 1 new receipt
- **Then** Platform offers to email the file directly (no full regeneration)

Story 4: Add Multiple Evidence Files

- **Given** Adjuster requests 3 additional documents
- **When** I upload 3 new files
- **Then** Platform offers to generate a 1-page supplemental packet or regenerate full packet

Story 5: Regeneration Limit

- **Given** I've regenerated twice
- **When** I try to regenerate a third time
- **Then** Platform blocks me and suggests contacting support

---

3. DETAILED REQUIREMENTS

3.1 Functional Requirements

FR-1: Packet Generation Trigger

- **REQ**: "Generate Claim Packet" button enabled ONLY when:
  - Coverage determination complete (F-6.5.5)
  - All required evidence uploaded (F-6.5.6)
- **Rationale**: Incomplete data = incomplete packet = adjuster rejection
- **Validation**: Platform checks `claim_status` and evidence completeness before enabling button

FR-2: Pre-Generation Confirmation

- **REQ**: Before generation, show modal:

"We're generating your claim packet.

A few things you should know:

To the best of our knowledge and ability, the information
in this packet was prepared in good faith by you and Wayfarer.

It's highly unlikely, but it's entirely possible that the
claims adjuster may determine you qualify under different
coverage, or that additional documentation is needed.

If that happens, we're here for you and standing by to
help generate an updated packet.

[I Understand] [Cancel]"

- **Rationale**: Set expectations, protect platform legally, reassure user
- **Event**: User clicks [I Understand] → *packet_generation_initiated*

FR-3: PDF Structure (13-Page Format)

- **REQ**: Generate PDF with exactly these sections:
    1. **Cover Page**: Wayfarer ref, claimants, claim type, total requested, contact info, alignment statement
    2. **Table of Contents**: Clickable links to all 9 sections
    3. **Section 1**: Claim Request Summary (metadata, expense summary table)
    4. **Section 2**: Narrative Account (editable first-person letter)
    5. **Section 3**: Cancellation Timeline (chronological events)
    6. **Section 4**: Original Travel Itinerary
    7. **Section 5**: Itemized Non-Refundable Losses
    8. **Section 6**: Refunds & Partial Recoveries
    9. **Section 7**: Coverage Reference & Clause Analysis
    10. **Section 8**: Accepted Compensation Disclosure
    11. **Section 9**: Evidence Index (EV-001, EV-002, etc.)
    12. **Section 10**: Where to Submit This Claim
    13. **Footer**: Every page shows "Prepared by Wayfarer · This does not constitute legal advice · Final eligibility determined by benefit administrator"
- **Source Template**: Wayfarer_Claim_Packet_v4.pdf (uploaded reference)

FR-4: DRAFT Watermark

- **REQ**: Generated PDF has diagonal "DRAFT" watermark across all pages
- **REQ**: Watermark removed when user clicks "Finalize & Download"
- **Event**: *claim_packet_finalized* emitted when watermark removed

FR-5: Clickable Internal Navigation

- **REQ**: Table of Contents → Clickable links to sections

- **REQ**: Evidence references (EV-001, etc.) → Clickable links to Evidence Index
- **REQ**: Cross-references ("See Section 6") → Clickable links
- **Implementation**: ReportLab `linkAbsolute()` with named destinations

FR-6: Editable vs Locked Fields

LOCKED (Not Editable):

- Names (claimants, primary insured)
- Policy number
- Insurer name
- Dates & times (incident date, departure date, filing date)
- Total requested (calculated from evidence)
- Expense summary (itemized table)
- Airline credit disclosure
- Clause-by-clause analysis (Section 7)
- Evidence Index (Section 9)
- Coverage references
- Refunds & Partial Recoveries (Section 6)

EDITABLE:

- Section 2: Narrative Account (full letter text)
- Cover Page: Alignment Statement (short summary)

Rationale: User already reviewed/approved locked fields during incident capture and evidence upload. Changing them post-generation creates inconsistencies.

FR-7: Narrative Editing Flow

- **REQ**: User clicks [Edit Narrative] → Modal opens with text editor
- **REQ**: Modal pre-populated with generated narrative
- **REQ**: User makes changes → Clicks [Save Changes]
- **REQ**: Platform regenerates packet with updated narrative (counts toward regeneration limit)
- **Event**: `narrative_edited` + `claim_packet_regenerated`

FR-8: Regeneration Rules

- **REQ**: Maximum 2 regenerations per claim
- **REQ**: Triggers for regeneration:
    - User edits narrative
    - User adds 4+ evidence files
    - User explicitly requests regeneration
- **REQ**: After 2nd regeneration, show:

"Regeneration Limit Reached

You've regenerated this packet twice.

If you still need changes, please contact support:
support@wayfarer.io

[Contact Support] [Use Current Packet]"

- **Data**: *regeneration_count* incremented, *last_regenerated_at* updated

FR-9: Smart Evidence Submission

- **REQ**: When user uploads new evidence AFTER packet generated:

1 file added:

Options:
○ Email to adjuster (no PDF generation)
○ Download only

2-3 files added:

Options:
○ Generate supplemental packet (Recommended)
○ Email files to adjuster
○ Download only

4+ files added:

Options:
○ Regenerate full packet (Recommended)
○ Generate supplemental packet
○ Download only

Narrative/timeline changed:

"You've changed the narrative/timeline.
Full packet regeneration required.

[Regenerate Full Packet]"

FR-10: Supplemental Evidence Packet (1-Page)

- **REQ**: Generate 1-page PDF cover sheet:
    - Original claim ref (Wayfarer + Insurer claim number)

    - Claimant name
    - Submission date
    - List of new evidence (EV-012, EV-013, etc.)
    - Contact information
    - Footer disclaimer
- **REQ**: Attach new evidence files (PDFs, image)
- **Output**: Cover sheet + evidence files (ZIP or individual attachments)

FR-11: Email Copy to User

- **REQ**: User can check "Email copy to me" during generation
- **REQ**: Email sent to account.email with:
    - Subject: "Your Wayfarer Claim Packet — Ready to Submit"
    - Body: Summary, where to submit, next steps
    - Attachment: PDF claim packet
- **REQ**: Email includes insurer submission instructions (portal URL, email, postal address)

FR-12: Insurer Claim Number Capture

- **REQ**: After submission, user can add insurer-assigned claim number
- **REQ**: Claim number appears on cover page of future regenerations
- **Data**: *insurer_claim_number* stored in claims table
- **Event**: *insurer_claim_number_added*

FR-13: Contact Information

- **REQ**: Cover page includes:

```
CONTACT INFORMATION
 Primary Contact: [account.display_name]
 Email: [account.email]
 Phone: [account.phone]
 Preferred Contact: Email
```

- **Placement**: Center of cover page, below metadata

FR-14: Signature Line (If Paper Submission)

- **REQ**: End of Section 2 (Narrative) includes:

```
If submitting via postal mail:

Signature: _____  Date: _____
        [Primary Insured Name]
```

- **Conditional**: Only shown if packet type supports postal mail

---

3.2 Data Model Requirements

Claims Table (Section 3.2 Amendment Needed)

sql
```sql
-- NEW FIELDS FOR F-6.5.14
ALTER TABLE claims ADD COLUMN packet_id uuid;  -- Already exists ✅
ALTER TABLE claims ADD COLUMN insurer_claim_number text;
ALTER TABLE claims ADD COLUMN packet_finalized_at timestamptz;
ALTER TABLE claims ADD COLUMN regeneration_count int DEFAULT 0;
ALTER TABLE claims ADD COLUMN last_regenerated_at timestamptz;

-- NEW claim_status VALUES
ALTER TYPE claim_status_enum ADD VALUE 'packet_generated';
ALTER TYPE claim_status_enum ADD VALUE 'submitted';
ALTER TYPE claim_status_enum ADD VALUE 'pending_response';
ALTER TYPE claim_status_enum ADD VALUE 'additional_info_requested';

-- CONSTRAINT
ALTER TABLE claims ADD CONSTRAINT max_regenerations
  CHECK (regeneration_count <= 2);
```

3.3 Integration Requirements

INT-1: F-6.5.2 (Coverage Graph)

- **Input**: Coverage determination results
- **Output**: Section 7 (Coverage Reference & Clause Analysis)
- **Mapping**: Coverage paths → Policy clauses → Structural alignment statements

INT-2: F-6.5.3 (Incident Capture)

- **Input**: Incident timeline events
- **Output**: Section 3 (Cancellation Timeline)
- **Mapping**: Incident events → Chronological table (Date/Time, Event, Evidence)

INT-3: F-6.5.5 (Coverage Determination)

- **Input**: Final coverage determination
- **Output**: Section 7 (Clause-by-clause analysis)
- **Mapping**: Covered cause → Policy clauses → Alignment verification

INT-4: F-6.5.6 (Evidence Management)

- **Input**: Uploaded evidence files
- **Output**: Section 9 (Evidence Index)
- **Mapping**: Evidence uploads → EV-001, EV-002 references → Table (Ref, Description, Type, Date)

INT-5: Section 8.7 (Centralized Export Service)

- **Requirement**: ALL packet generation MUST route through CES
- **Flow**:
  1. F-6.5.14 prepares packet data (JSON structure)
  2. F-6.5.14 calls CES with *export_profile: TRAVELER_PERSONAL*
  3. CES generates PDF using *template: claim_packet_v4*
  4. CES returns PDF path
  5. F-6.5.14 stores *packet_id* in claims table
- **Details**: TODO — Define exact CES integration in Section 8.7 amendment

---

3.4 Event Emissions

TODO: Define full schemas in Section 8.4 amendment

Events emitted by F-6.5.14:

1. *claim_packet_generated*
2. *claim_packet_regenerated*
3. *supplemental_evidence_packet_generated*
4. *insurer_claim_number_added*
5. *claim_packet_finalized*
6. *claim_packet_emailed*
7. *narrative_edited*
8. *regeneration_limit_reached*

---

4. USER EXPERIENCE (SCREEN SURFACES)

4.1 Screen 8A: Claim Packet Generator (Main Screen)

Mapped Feature: F-6.5.14

Route: `/claims/:claim_id/generate-packet`

Entry Point: From claim detail screen after coverage determined + evidence complete

Display:

```
┌──────────────────────────────────────────────────────────────┐
│ Generate Claim Packet                                        │
├──────────────────────────────────────────────────────────────┤
│                                                              │
│ Your claim is ready to be packaged for submission.           │
│                                                              │
│ CLAIM SUMMARY                                                │
│ Claim Type: Trip Cancellation — Medical Emergency            │
│ Total Requested: $14,230.00                                  │
│ Evidence Files: 11                                           │
│ Coverage: Allianz OneTrip Premier                            │
│                                                              │
│ The packet will include:                                     │
│ • Structured claim summary                                   │
│ • Your incident narrative                                    │
│ • Complete evidence index                                    │
│ • Coverage clause analysis                                   │
│ • All required documentation                                 │
│                                                              │
│ [Generate Claim Packet]                                      │
│                                                              │
└──────────────────────────────────────────────────────────────┘
```

Behavior:

- Button enabled ONLY when coverage + evidence complete
- Click → Shows pre-generation modal (FR-2)
- After [I Understand] → Generates packet → Takes to Screen 8B

Event: `claim_packet_generation_initiated`

4.2 Screen 8B: Claim Packet Preview (With Watermark)

Mapped Feature: F-6.5.14
Route: `/claims/:claim_id/packet/preview`
Entry Point: After packet generation

Display:

```
┌──────────────────────────────────────────────────────────────┐
│ Your Claim Packet                                            │
├──────────────────────────────────────────────────────────────┤
│                                                              │
│ [PDF Preview with DRAFT watermark]                           │
│                                                              │
│──────────────────────────────────────────────────────────────│
│                                                              │
│ ACTIONS                                                      │
│                                                              │
│ [Edit Narrative] — Make changes to your story                │
│                                                              │
│ [Finalize & Download] — Remove draft watermark               │
│                                                              │
│ ☐ Email copy to me (marcus.chen@email.com)                  │
│                                                              │
│ Regenerations remaining: 2                                   │
│                                                              │
└──────────────────────────────────────────────────────────────┘
```

Behavior:

- PDF preview shows DRAFT watermark
- [Edit Narrative] → Opens modal (editable text area)
- [Finalize & Download] → Removes watermark, downloads PDF
- Email checkbox → Sends email with PDF attachment

Events:

- `claim_packet_finalized` (on finalize)
- `claim_packet_emailed` (if checkbox checked)

4.3 Screen 8C: Add Documentation (Post-Submission)

Mapped Feature: F-6.5.14

Route: `/claims/:claim_id/add-documentation`

Entry Point: From claim detail after packet submitted

Display:

```
┌──────────────────────────────────────────────────────────────┐
│ Add Documentation                                            │
├──────────────────────────────────────────────────────────────┤
│                                                              │
│ Did the insurer assign a claim number?                       │
│ ○ Yes → [_____________]                                      │
│ ○ No, not yet                                                │
│                                                              │
│ [Continue]                                                   │
│                                                              │
│ ────────────────────────────────────────────────────────────│
│                                                              │
│ What would you like to do?                                   │
│                                                              │
│ [Upload Additional Evidence]                                 │
│ Add receipts, emails, or documents the insurer               │
│ requested                                                    │
│                                                              │
│ [Upload Insurer's Request]                                   │
│ Forward their email or upload their letter, and              │
│ we'll help you figure out what they need                     │
│                                                              │
└──────────────────────────────────────────────────────────────┘
```

Behavior:

- If claim number entered → Saved to `insurer_claim_number`
- [Upload Additional Evidence] → Takes to F-6.5.6 (Evidence Upload)
- [Upload Insurer's Request] → Platform attempts to parse (or shows error)
- After evidence upload → Takes to Screen 8D (Smart Submission)

Event: `insurer_claim_number_added` (if claim number provided)

4.4 Screen 8D: Supplemental Evidence Submission (Smart Choice)

Mapped Feature: F-6.5.14

Route: /claims/:claim_id/supplemental-submission

Entry Point: After uploading evidence post-packet-generation

Display (1 file added):

```
┌──────────────────────────────────────────────────────────┐
│ Evidence Added                                           │

Display (4+ files added):

```
Evidence Added
---------------------------------------------
• EV-012, EV-013, EV-014, EV-015, EV-016

  You've added 5 new evidence files.

How would you like to submit these?

○ Regenerate full packet (Recommended)
  Updated 13-page claim packet with all evidence

○ Generate supplemental packet
  1-page cover sheet + new evidence files

○ Download only
  You'll send them yourself

Regenerations remaining: 1

[Continue]
```

Behavior:

- Logic switches based on *evidence_count_added* (FR-9)
- Email option → Platform sends email with attachments (no PDF)
- Supplemental packet → Generates 1-page cover + files
- Regenerate → Full 13-page PDF regeneration (counts toward limit)

Events:

- *supplemental_evidence_packet_generated* (if supplemental chosen)
- *claim_packet_regenerated* (if full regen chosen)

---

5. MICROCOPY (BINDING LANGUAGE)

5.1 Cover Page — Alignment Statement

Alignment Statement: [Primary Insured Name] was [incident summary].
[Policy action]. [Timeline]. [Physician certification if medical].

All bookings were non-refundable. Total non-recoverable loss: $[amount].
Final review is performed by the benefit administrator.

Example:

Alignment Statement: Marcus Chen was admitted to Emory University Hospital on March 18, 2026 for emergency appendectomy. Surgery was performed the same day. Departure for a 10-night Italy honeymoon was scheduled for March 21, 2026 — 3 days after hospitalization. The attending physician issued a written declaration certifying Marcus unfit to travel through at least April 4, 2026.
All bookings were non-refundable. Total non-recoverable loss: $14,230.00.
Final review is performed by the benefit administrator.

5.2 Footer (Every Page)

Prepared by Wayfarer · wayfarer.io · © 2026 Wayfarer Technologies, Inc.
This document does not constitute legal advice. Final eligibility is determined by the benefit administrator.

5.3 Section 2 — Narrative Header

The following account was prepared from verified incident records, timeline data, and confirmed evidence. It is a draft — the claimant may edit before submission. It does not contain predictive language about claim outcomes.

5.4 Section 7 — Clause Analysis Language

Clause-by-Clause Analysis

[Covered Cause Name]
Recorded fact: [What happened]
Clause: [Policy clause text]
Structural alignment: Satisfied.

Final review is performed by the benefit administrator.

Never use: "You qualify", "You will be reimbursed", "Guaranteed", "Highly likely"

5.5 Section 10 — Where to Submit

10. Where to Submit This Claim

[INSURER NAME] — [POLICY TYPE]

Online Portal (Recommended):
[URL]

Email:
[claims email address]

Postal Mail:
[Insurer Name]
[Address]

NEXT STEPS

1. Review this packet carefully
2. Download or email yourself a copy
3. Submit to insurer via online portal or email
4. Keep a copy for your records

If the insurer requests additional documentation,
log back into Wayfarer and we'll help you out.

5.6 Email Copy Message (To User)

Subject: Your Wayfarer Claim Packet — Ready to Submit

Hi [First Name],

Here's your claim packet for your [trip destination] trip [incident type].

CLAIM SUMMARY
Insurer: [Insurer Name] — [Policy Type]
Claim Type: [Type]
Total Requested: $[amount]
Wayfarer Ref: [WF-YYYY-#####]

WHAT'S ATTACHED
- Complete claim packet (PDF) — Ready to submit
- Evidence files ([count] documents)

NEXT STEPS
1. Review the attached packet

2. Submit to [Insurer] via their online portal or email
3. Keep a copy for your records

WHERE TO SUBMIT
Online: [portal URL]
Email: [claims email]

If the insurer requests additional documentation, log back into Wayfarer and we'll help you out.

5.7 Regeneration Limit Reached

Regeneration Limit Reached

You've regenerated this packet twice.

If you still need changes, please contact support:
support@wayfarer.io

[Contact Support] [Use Current Packet]

---

6. NON-FUNCTIONAL REQUIREMENTS

6.1 Performance

- Packet generation: < 30 seconds for 13-page PDF
- Supplemental packet: < 5 seconds for 1-page cover
- PDF preview load: < 3 seconds

6.2 Reliability

- Packet generation success rate: > 99.5%
- If generation fails: Show error, save partial progress, allow retry
- Event ledger: 100% of generations logged

6.3 Security

- PDF export via CES (Section 8.7) — No direct PDF assembly in UI
- Contact info (email, phone) pulled from encrypted account data
- Medical evidence (if present) redacted from packet unless user explicitly includes

6.4 Accessibility

- PDF meets WCAG 2.1 AA standards
- Clickable links have descriptive text
- PDF readable by screen readers

---

7. DEPENDENCIES

7.1 Feature Dependencies

Feature	Dependency Type	Required Data
F-6.5.2 (Coverage Graph)	Hard	Coverage paths, policy matches
F-6.5.3 (Incident Capture)	Hard	Timeline events
F-6.5.5 (Coverage Determination)	Hard	Final coverage decision
F-6.5.6 (Evidence Management)	Hard	Evidence uploads, refs
F-6.51 (Policy Parsing)	Soft	Policy clause text

7.2 Section Dependencies

Section	Dependency Type	Purpose
Section 3.2 (Data Objects)	Hard	Claims table schema
Section 7.3 (Screen Surfaces)	Hard	Screen definitions (4 new screens)
Section 8.7 (Export Governance)	Hard	CES integration

Section 9.2 (Confidence Labels)	Hard	Language constraints

7.3 External Dependencies

- ReportLab (Python PDF generation library)
- Email service (for packet delivery)
- CES (Centralized Export Service) — TODO: Define integration

---

8. SUCCESS METRICS

8.1 Usage Metrics

- Packet generations per month
- Regeneration rate (% of users who regenerate)
- Supplemental packet usage (% vs full regen)
- Average time from generation to user submission

8.2 Quality Metrics

- Packet completeness score (all sections populated?)
- Evidence reference accuracy (EV-### matches evidence table?)
- User edits to narrative (% who edit before finalization)

8.3 Cost Metrics

- Average cost per packet generation
- Cost savings: Supplemental vs full regeneration
- Regeneration limit effectiveness (% hitting 2-regen limit)

---

9. OPEN QUESTIONS / TODO

9.1 Technical Implementation (Deferred)

- **TODO**: Define exact CES integration flow (Section 8.7 amendment)
- **TODO**: Define 6 event schemas (Section 8.4 amendment)
- **TODO**: Add 4 new fields to claims table (Section 3.2 amendment)
- **TODO**: Add ReportLab implementation notes (Section 12 amendment)
- **TODO**: Write 7 stress tests (Section 15.1)

9.2 Design Decisions (Quick Answers Needed)

- **TODO**: Voice editing for narrative — MVP (text only) or Phase 2 (add voice)?
- **TODO**: Trip maturity interaction — Does packet gen change *trip_status*? (Likely NO)

---

10. PHASE NOTES

10.1 Phase 1 (MVP) — IN SCOPE

- Full claim packet generation (13 pages)
- Supplemental evidence packets (1 page)
- Smart submission logic
- Regeneration (2 max)
- Narrative editing (text only)
- Email delivery
- Insurer claim number capture

10.2 Phase 2+ — DEFERRED

- Voice narration for narrative edits
- Automated insurer email parsing
- Auto-fill support (vs copy/paste)
- Direct API integration with insurer portals
- Automated follow-up tracking
- Multi-language packet generation

---

11. COMPLIANCE & GOVERNANCE

11.1 Section 1.0 (Mission & Tone)

- ✅ Platform does NOT file claims (user submits)
- ✅ Human-centered language (first person, natural tone)
- ✅ No legal advice disclaimer on every page

11.2 Section 9.2 (Confidence Labels)

- ✅ No predictive language ("you qualify", "guaranteed")
- ✅ Coverage framed as "structural alignment" not "guarantee"
- ✅ Footer: "Final review by benefit administrator"

11.3 Section 8.7 (Export Governance)

- ✅ All exports route through CES
- ✅ Export profile: TRAVELER_PERSONAL
- ✅ No direct PDF assembly in UI

---

12. CROSS-REFERENCES

12.1 Referenced By

- Section 3.2 (Claims table `packet_id` field)
- Section 7.3 (Screen Surface Registry — Screens 8A-8D)
- Section 8.7 (Export Governance — CES integration)
- Section 9.2 (Confidence Labels — Language constraints)
- Section 12.1-12.3 (Build Strategy — MVP requirement)

12.2 References

- F-6.5.2 (Coverage Graph)
- F-6.5.3 (Incident Capture)
- F-6.5.5 (Coverage Determination)
- F-6.5.6 (Evidence Management)
- F-6.51 (Policy Parsing)
- Section 3.2 (Core Data Objects)
- Section 8.7 (Export Governance)
- Section 9.2 (Confidence Labels)

---

13. APPROVAL & SIGN-OFF

Feature Owner: Christian (Founder)
Approved: March 13, 2026
Status: Ready for Implementation

Outstanding Items:

- CES integration flow (Section 8.7 amendment)
- Event schemas (Section 8.4 amendment)
- Data model amendments (Section 3.2)
- Stress tests (Section 15.1)
